

Tropical Atlantic Biases: A Biased Global Coupled Model Perspective

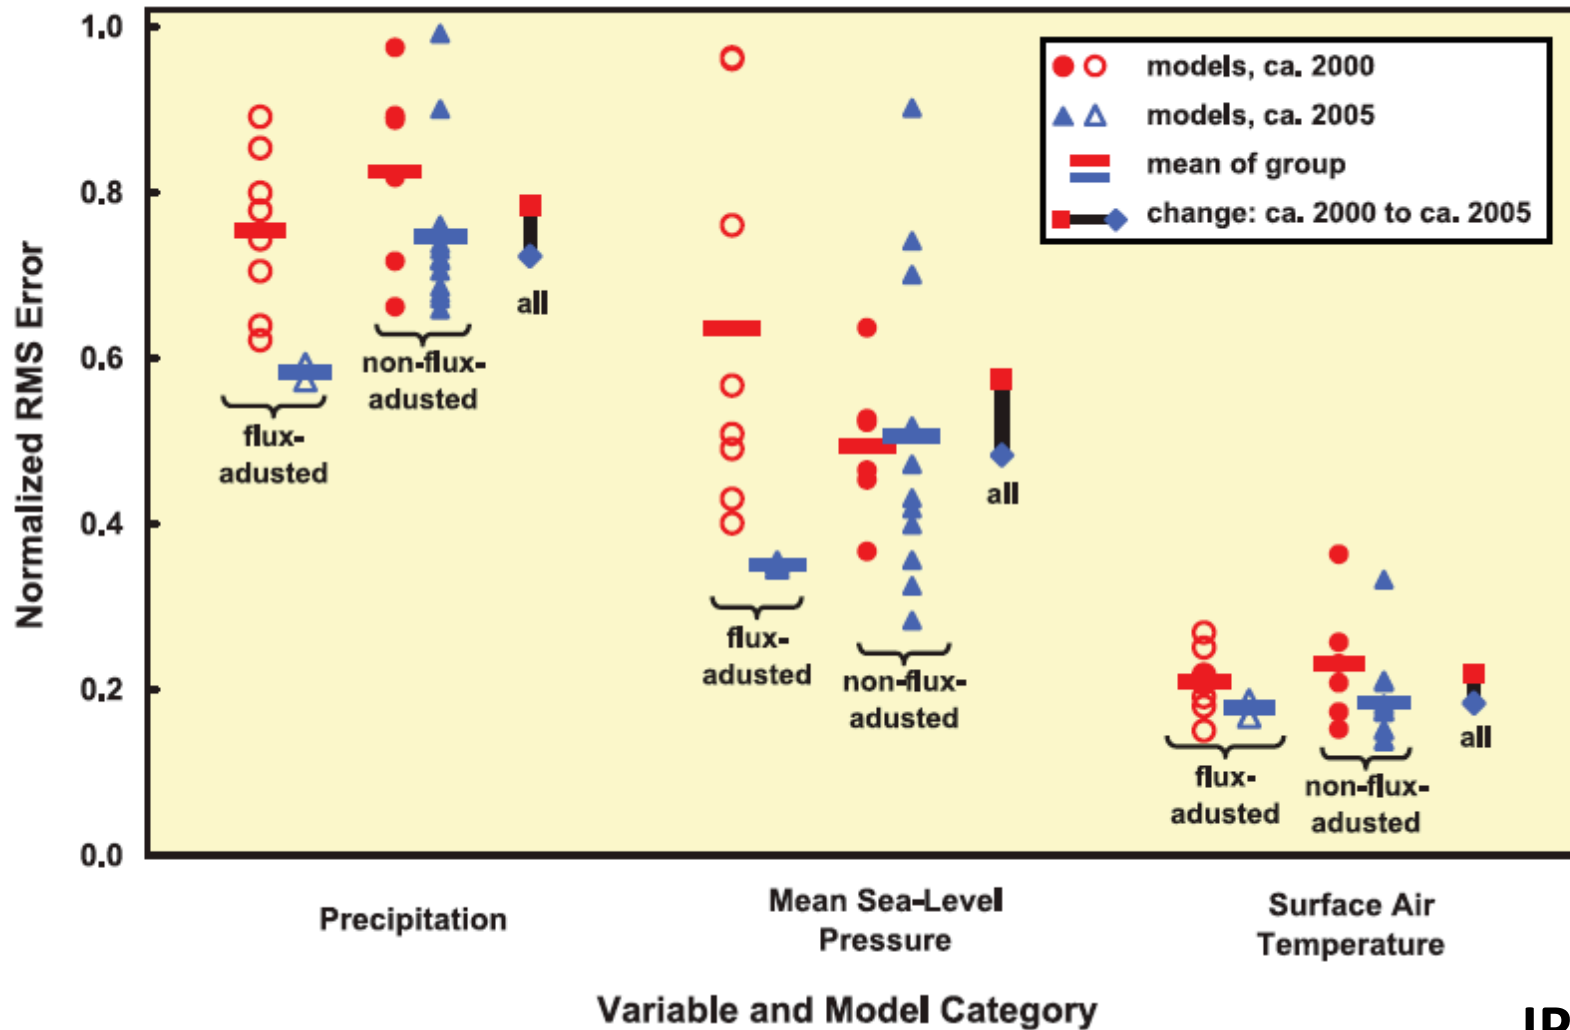

Biased Perspective of Biases

- **Attribution**
- **Parameterization Development and Improvement:**
 - Processes
 - Seamless Approach
 - Uncertainty Quantification (Stochastic-Dynamic)
- **Resolution:**
 - AGCMs
 - OGCMs (eddy resolving vs. eddy permitting)

CMIP3 Errors: Rainfall and SST

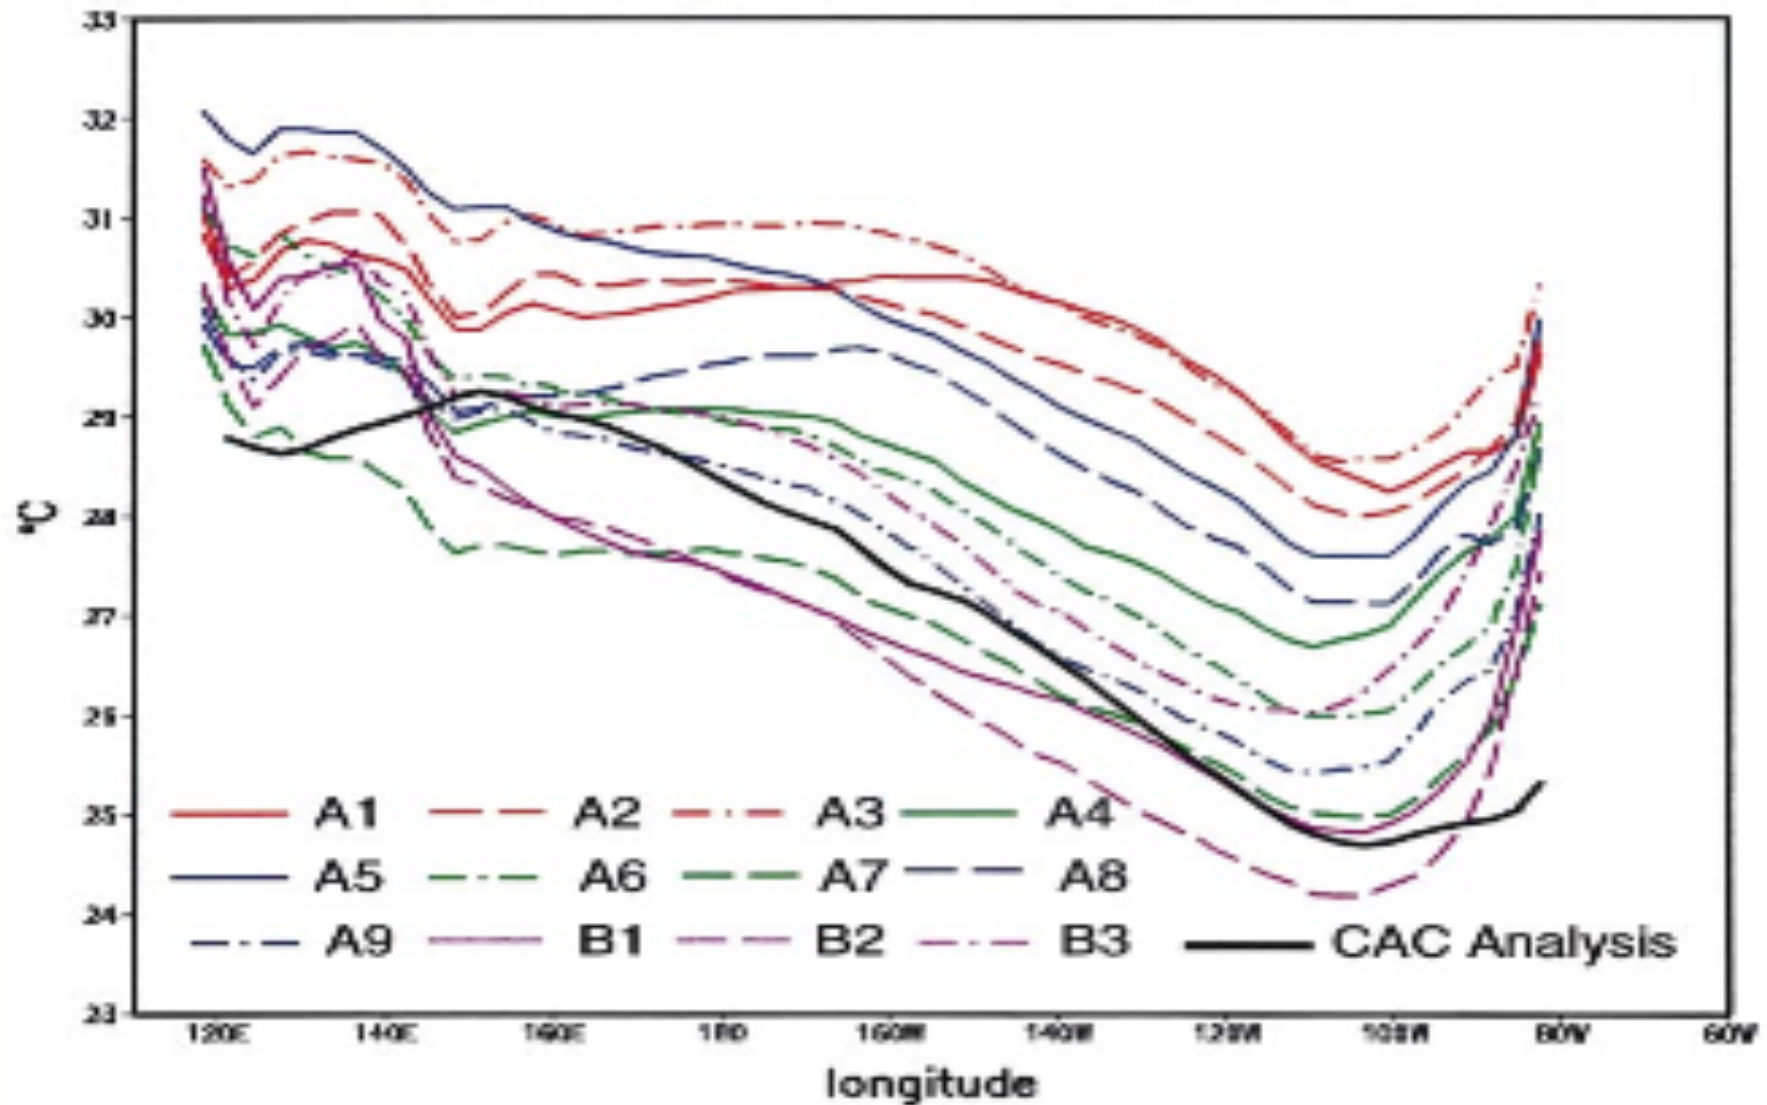

Have Models Improved? Maybe, Not in the Atlantic

Biased Perspective of Biases

- Attribution
- **Parameterization Development and Improvement:**
 - Processes
 - Seamless Approach
 - Uncertainty Quantification (Stochastic-Dynamic)
- **Resolution:**
 - AGCMs
 - OGCMs (eddy resolving vs. eddy permitting)

Schneider (2002):

“... atmospheric models ... are primarily responsible for differences ...”

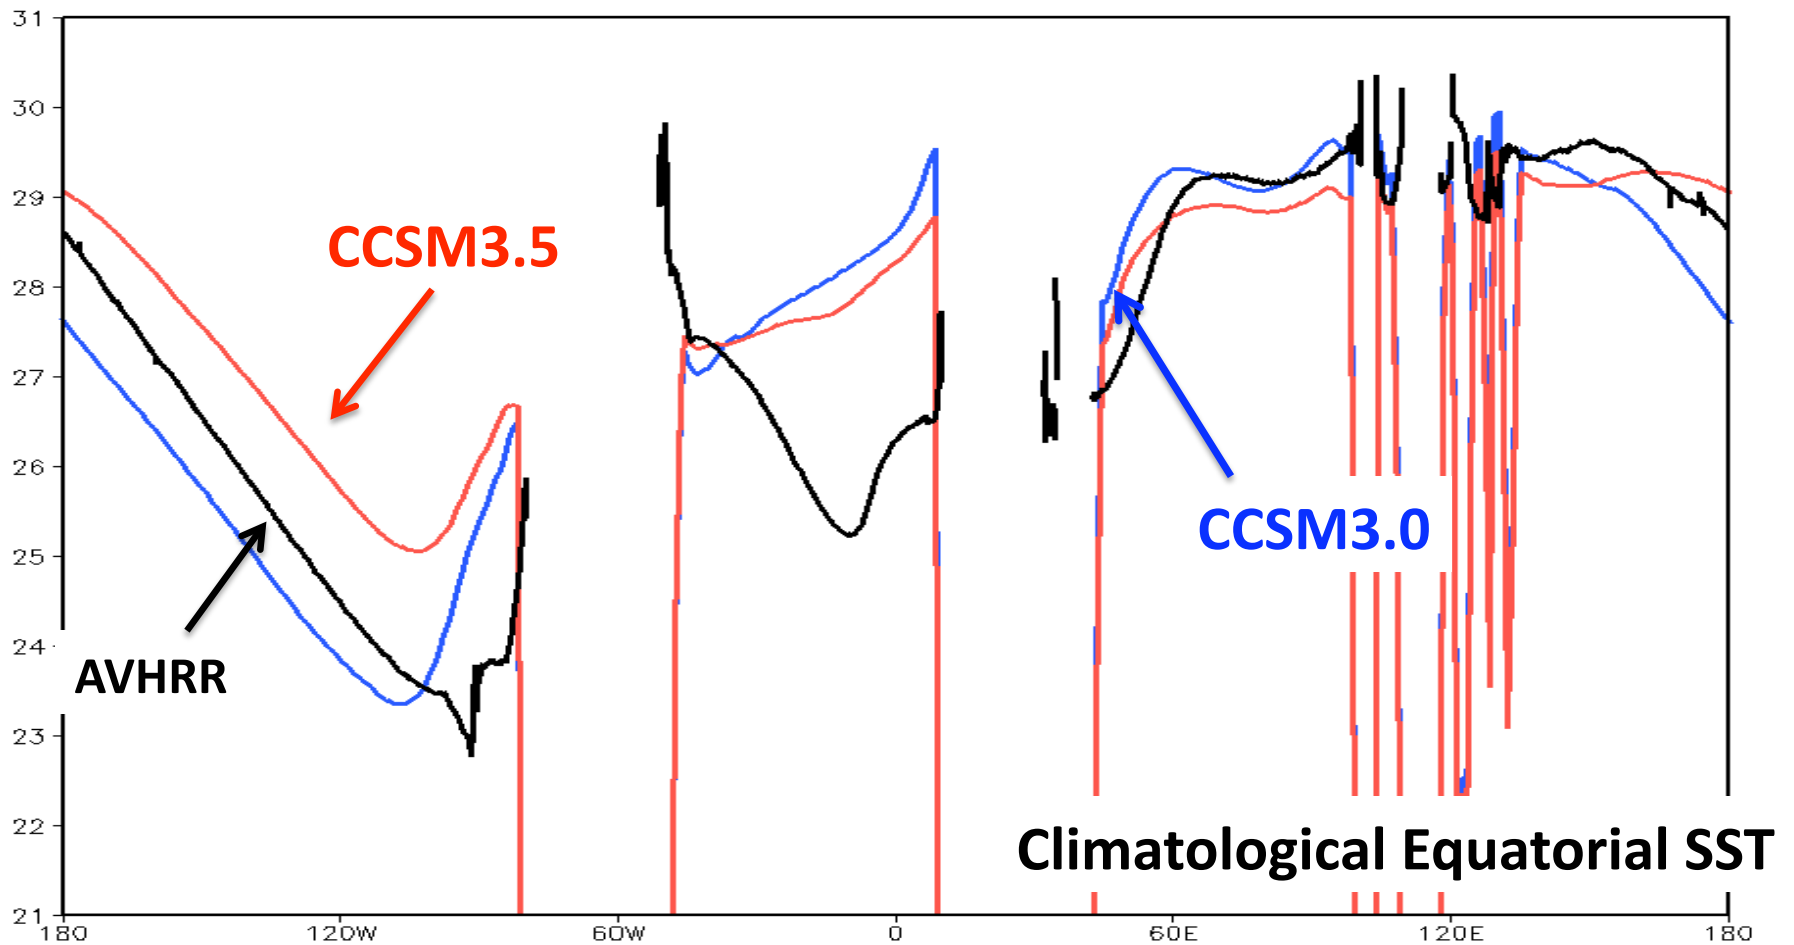

“... no dominant process ... that explains the differences...”

Biased Perspective of Biases

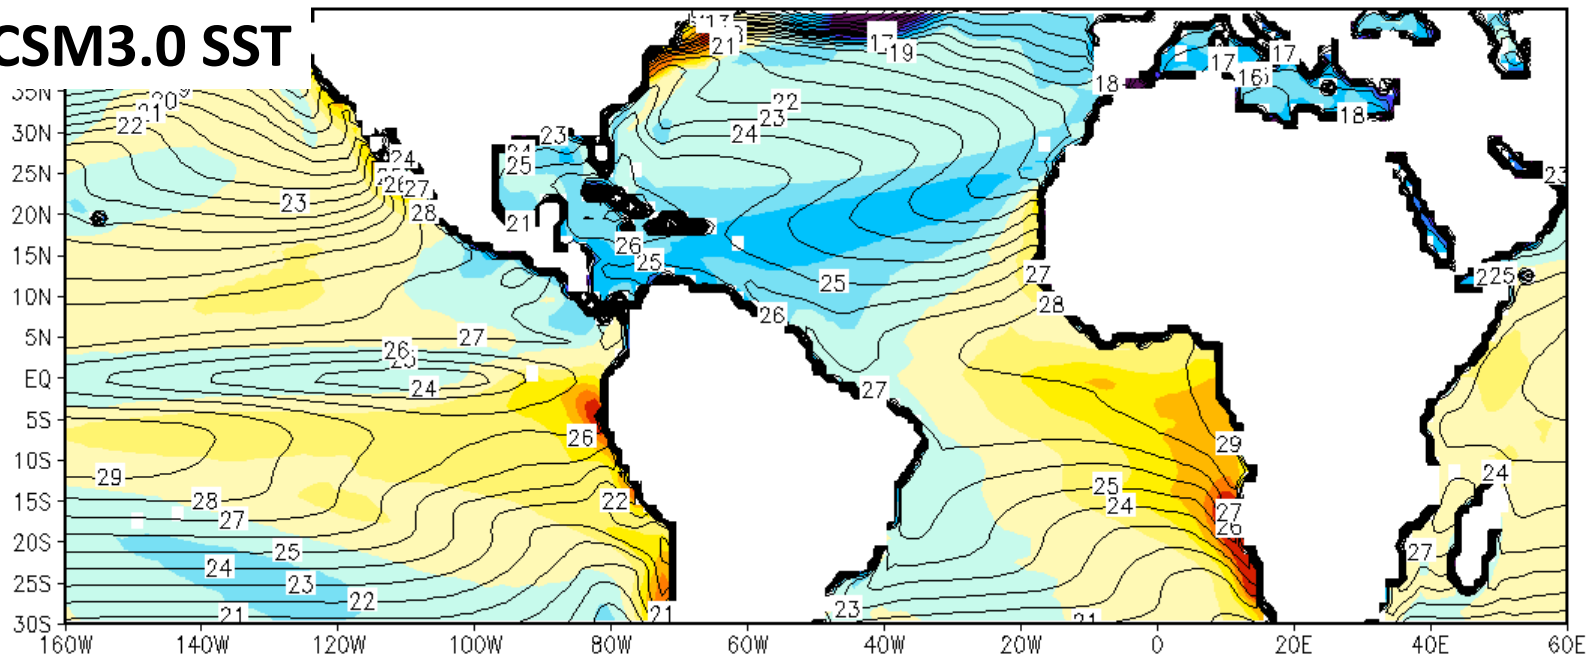

- **Attribution**
- **Parameterization Development and Improvement:**
 - Processes
 - Seamless Approach
 - Uncertainty Quantification (Stochastic-Dynamic)
- **Resolution:**
 - AGCMs
 - OGCMs (eddy resolving vs. eddy permitting)

Affect of Improved Parameterized Physics

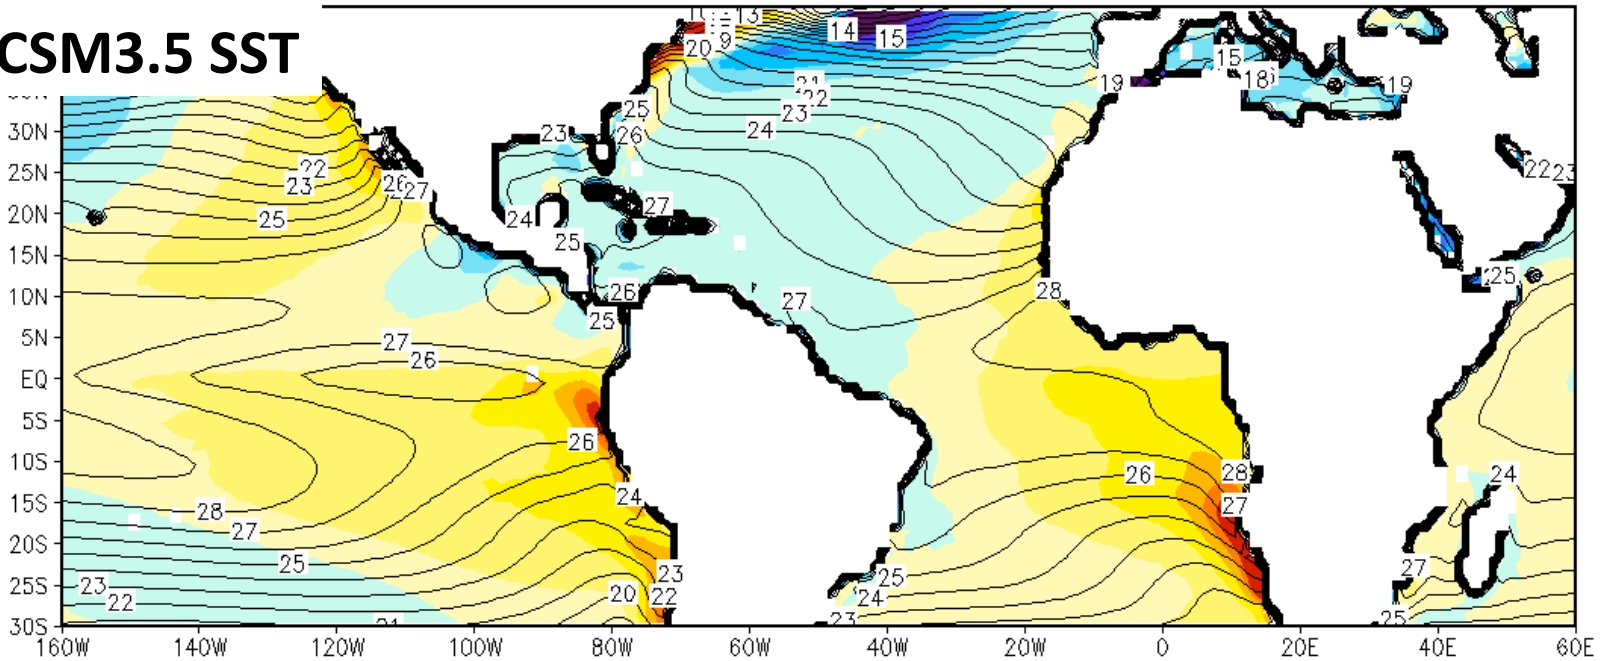

- **CCSM3.0 vs CCSM3.5**
 - Atmosphere: T85; Ocean 1x1

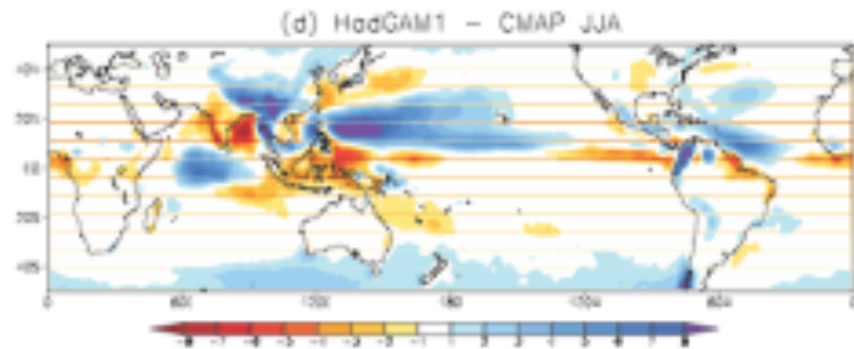

CCSM3.0 SST

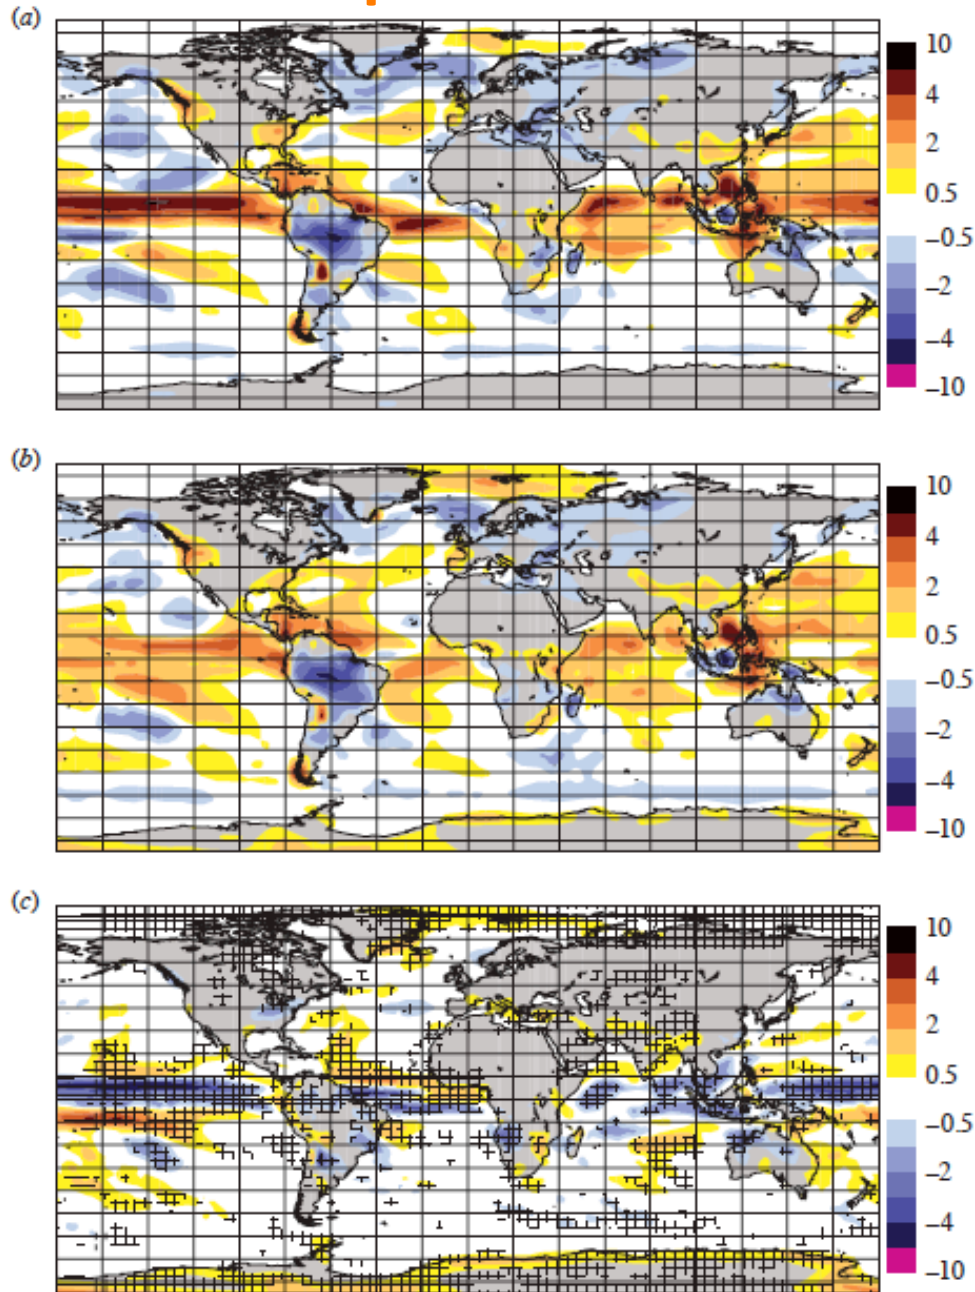

CCSM3.5 SST

Martin et al. (2010): Reduction of Systematic Errors through a Seamless Approach to Modeling Weather and Climate

Precipitation Bias

**Parameterization of Model
Uncertainty:**

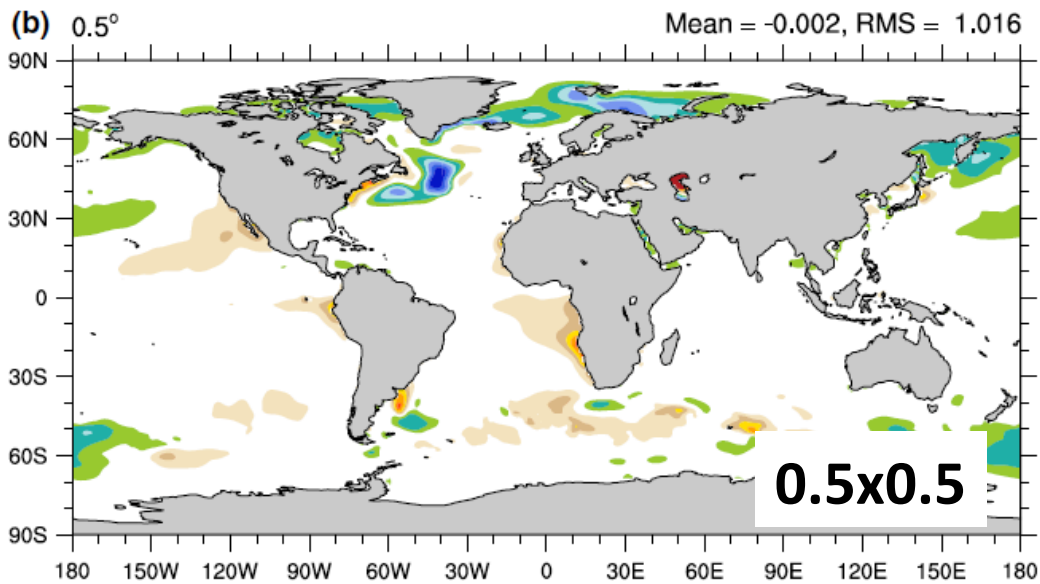

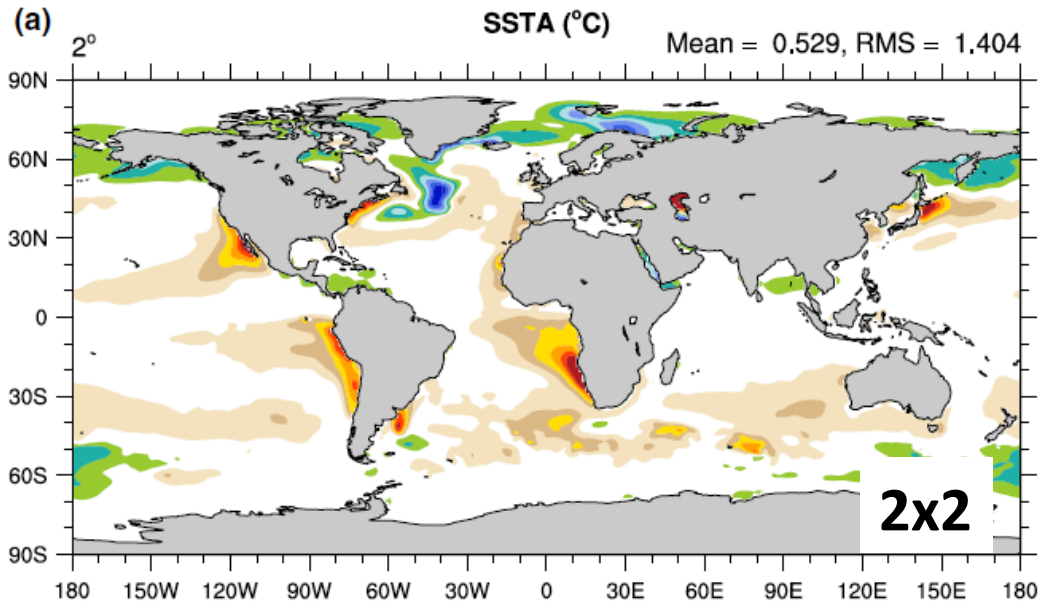

**Stochastic-Dynamic
Approaches (Palmer 2001)**

**Stochastic Physics (Buizza et
al. 1999)**

**Stochastic Backscatter
(Berner et al. 2008)**

Biased Perspective of Biases

- **Attribution**
- **Parameterization Development and Improvement:**
 - Processes
 - Seamless Approach
 - Uncertainty Quantification (Stochastic-Dynamic)
- **Resolution:**
 - AGCMs
 - OGCMs (eddy resolving vs. eddy permitting)

**Increasing AGCM Resolution:
2x2 vs 0.5x0.5**

Gent et al. 2010

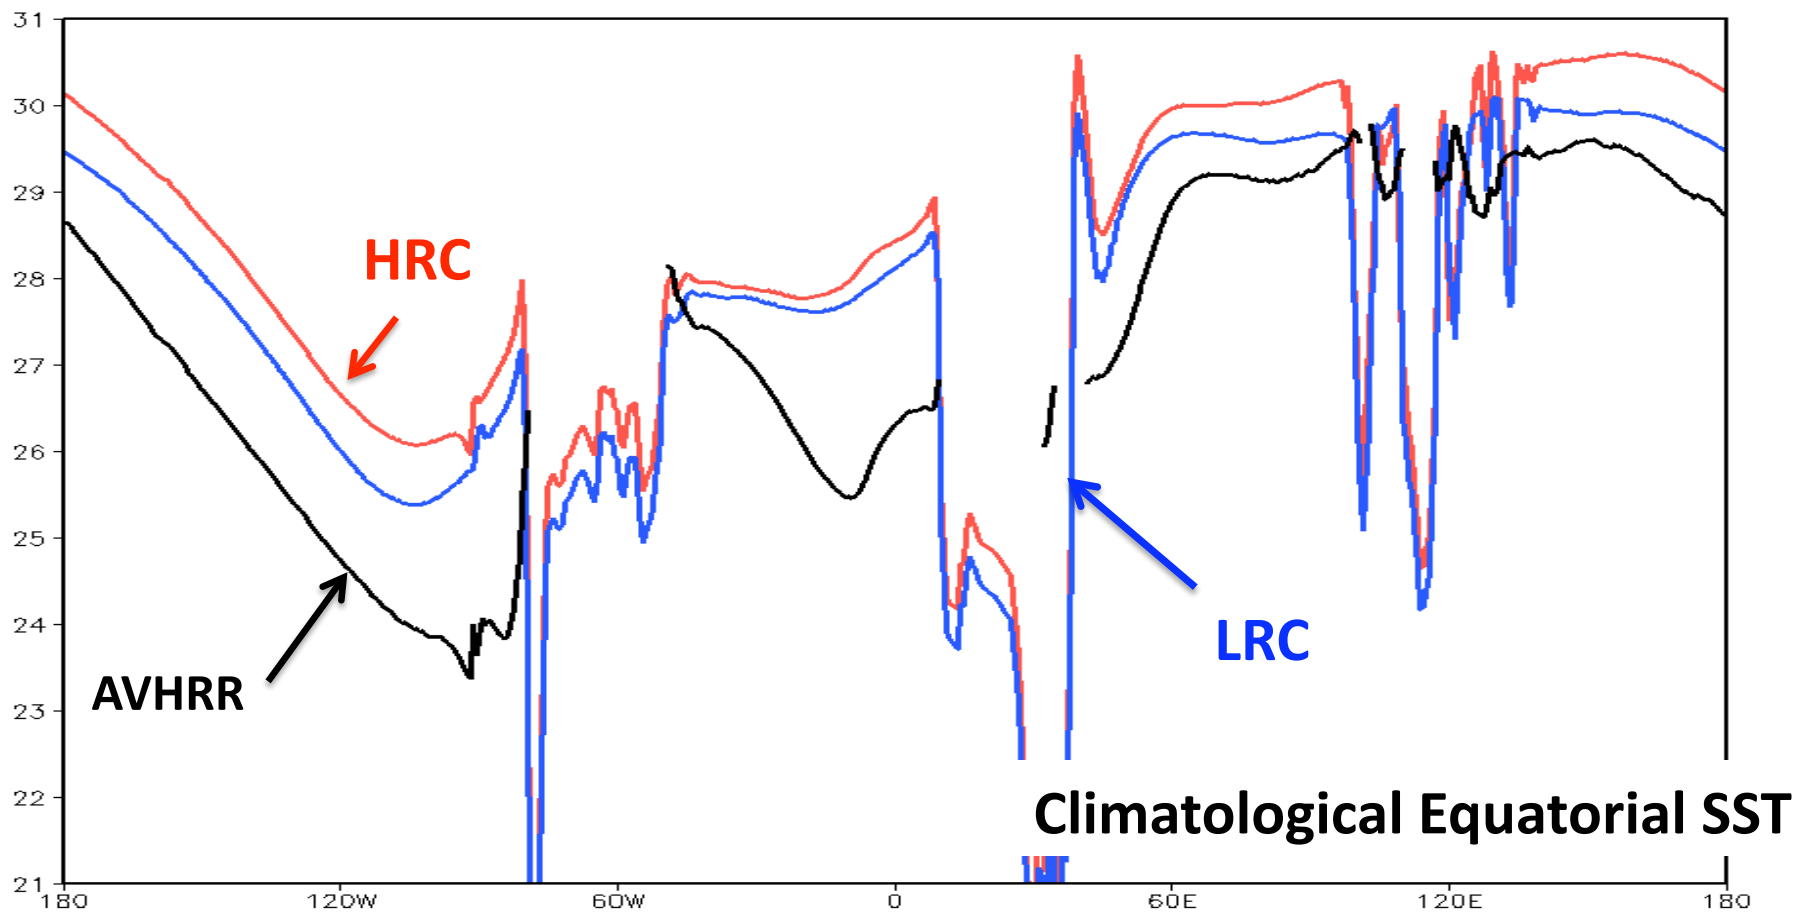

Biased Perspective of Biases

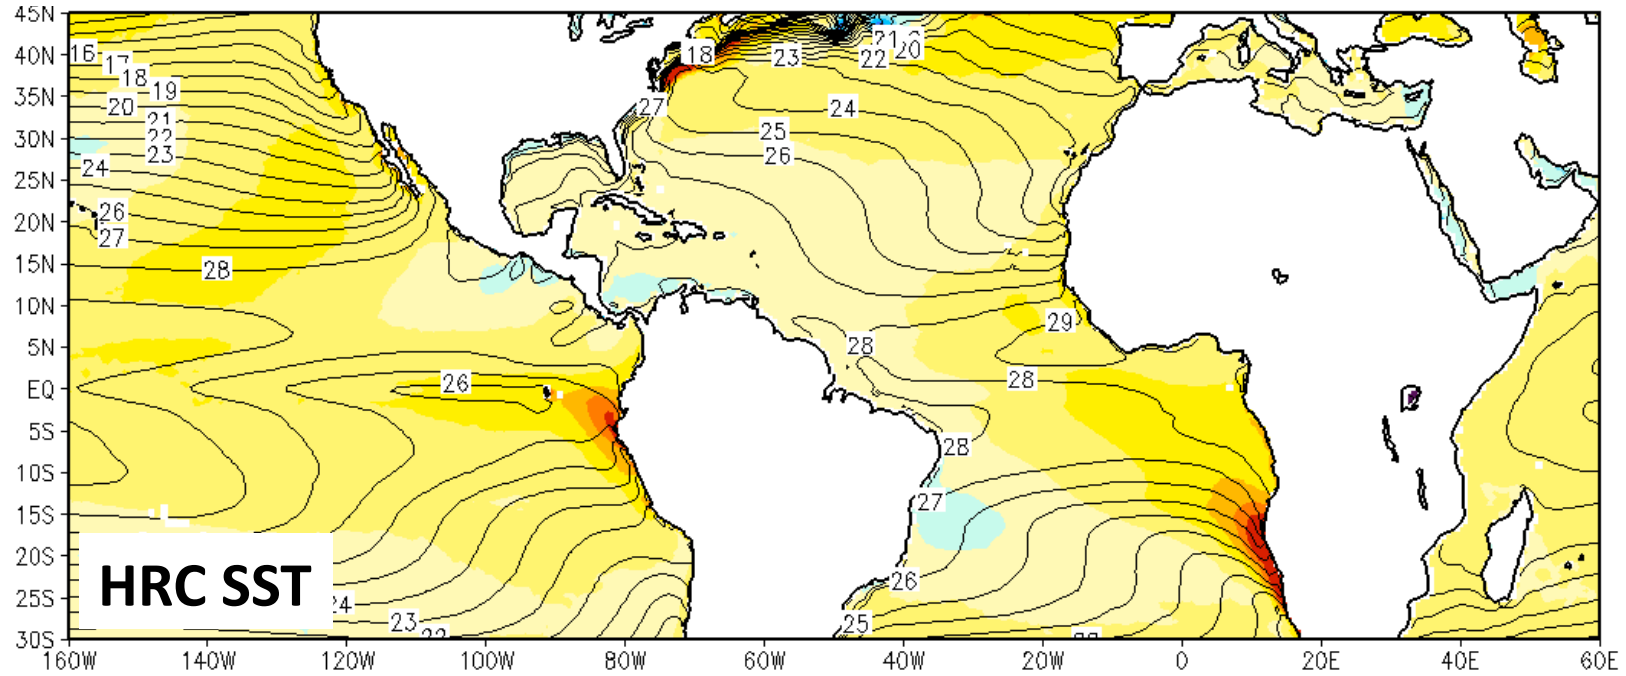

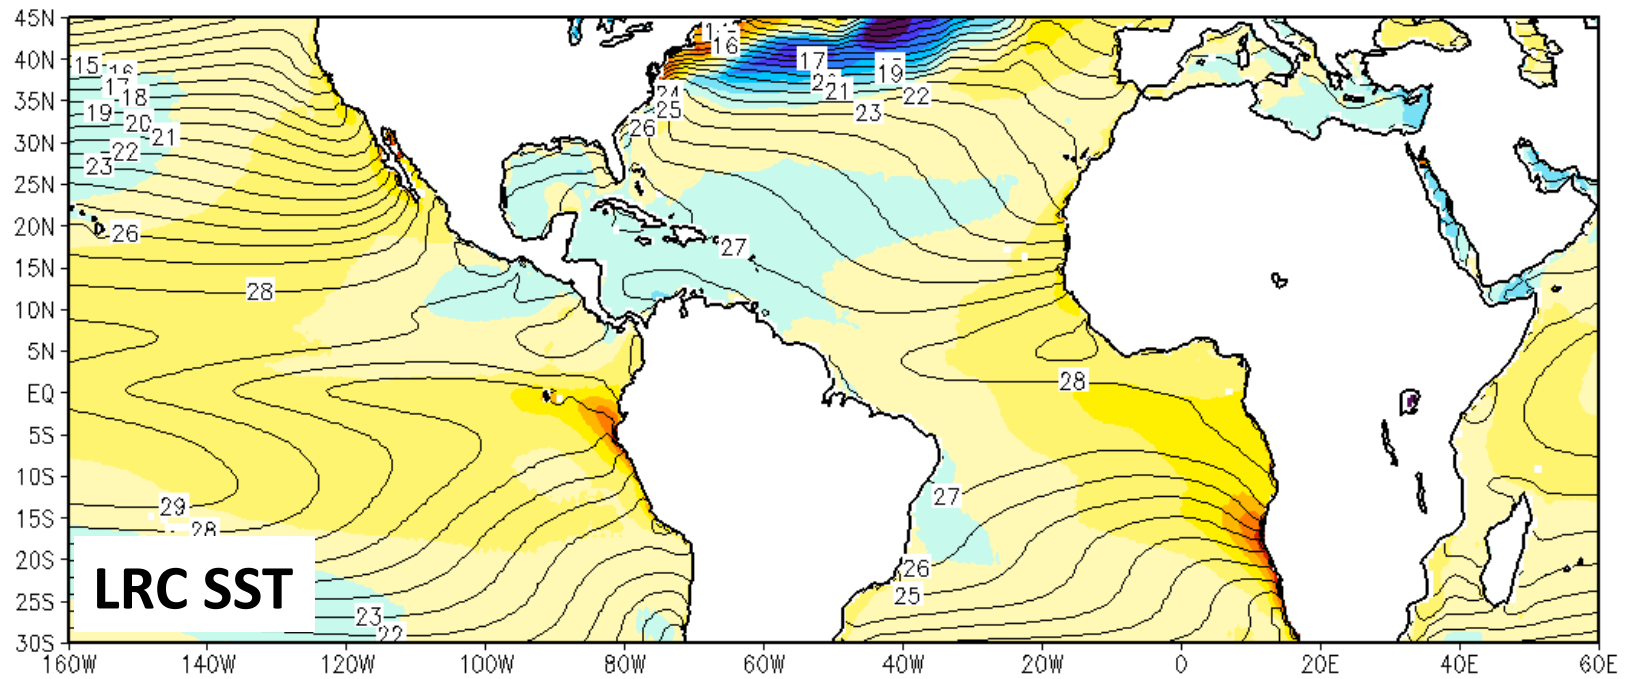

- **Attribution**
- **Parameterization Development and Improvement:**
 - Processes
 - Seamless Approach
 - Uncertainty Quantification (Stochastic-Dynamic)
- **Resolution:**
 - AGCMs
 - **OGCMs (eddy resolving vs. eddy permitting)**

Affect of Resolved Ocean Eddies

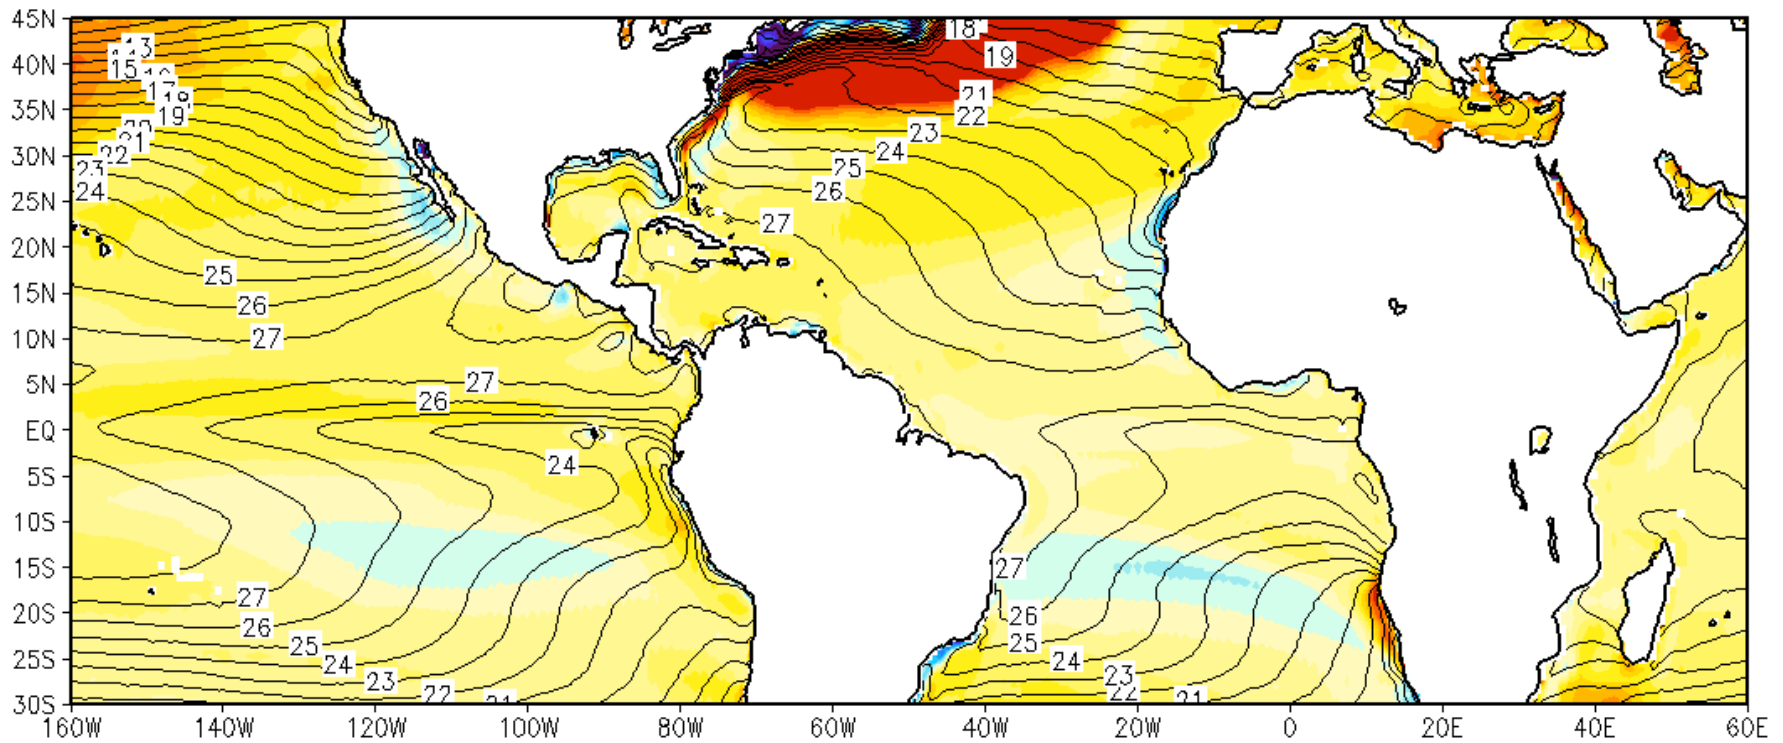

- **CCSM4**

- Atmosphere: 0.5x0.5
- Two Versions: 1x1 [**LRC**] and 0.1x0.1 [**HRC**]

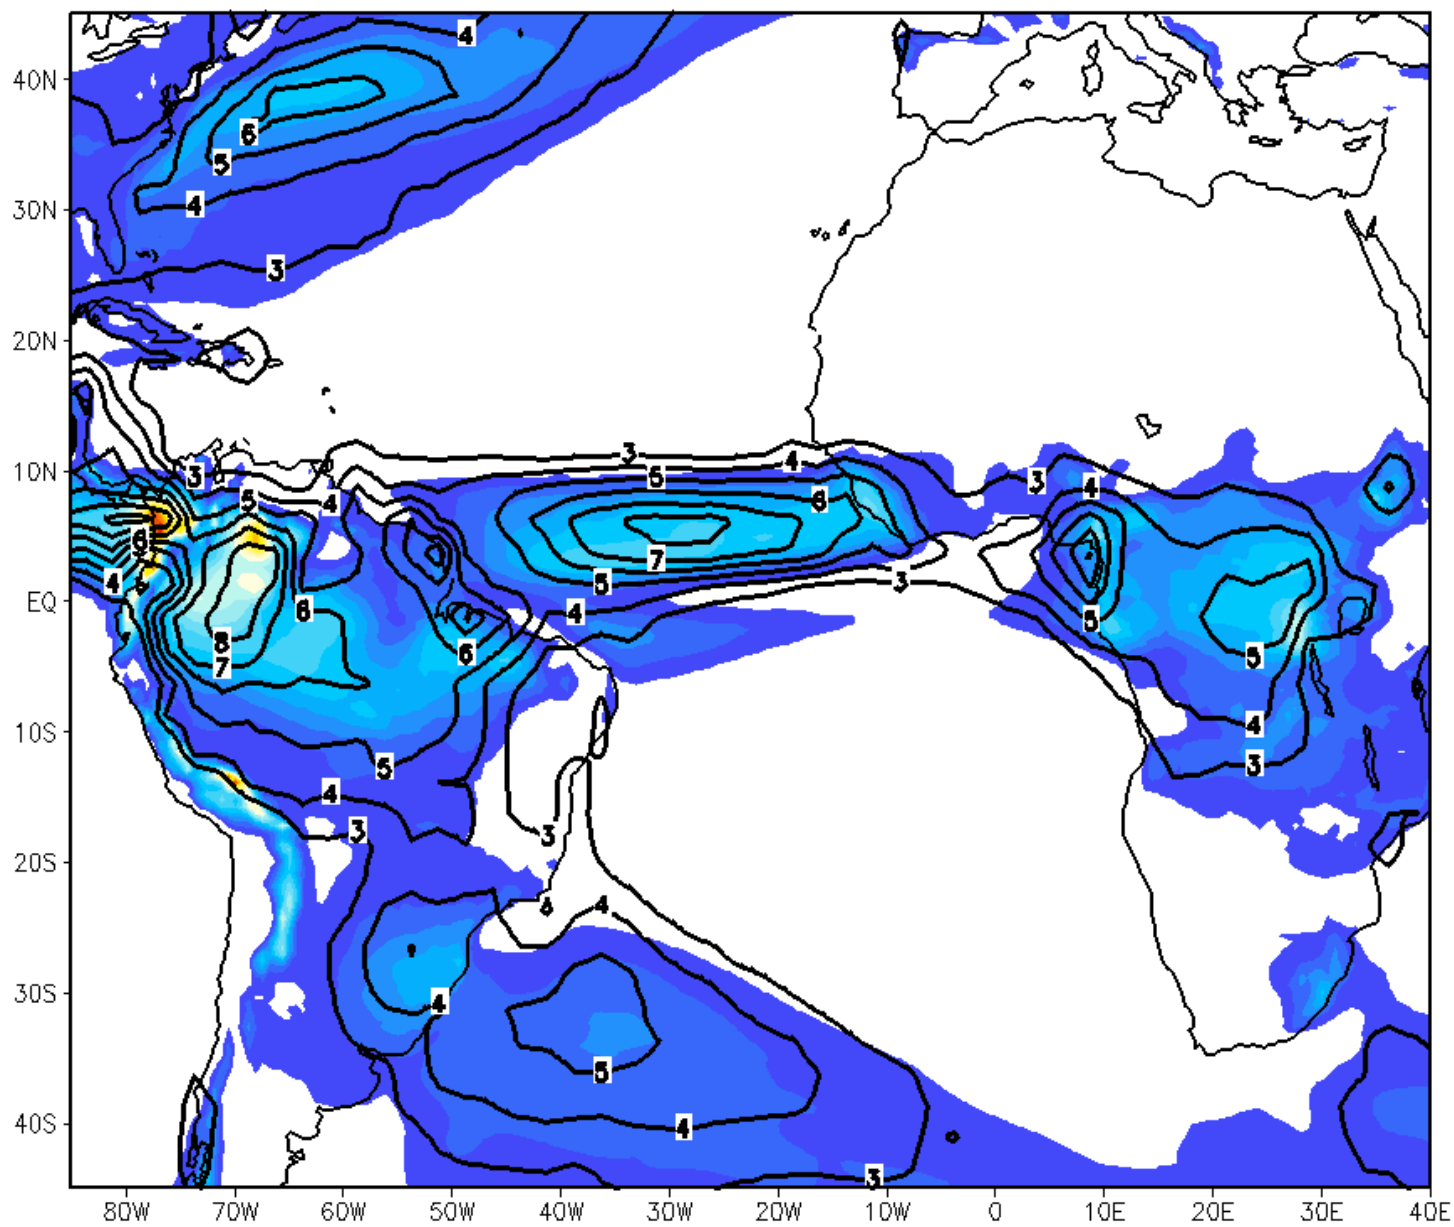

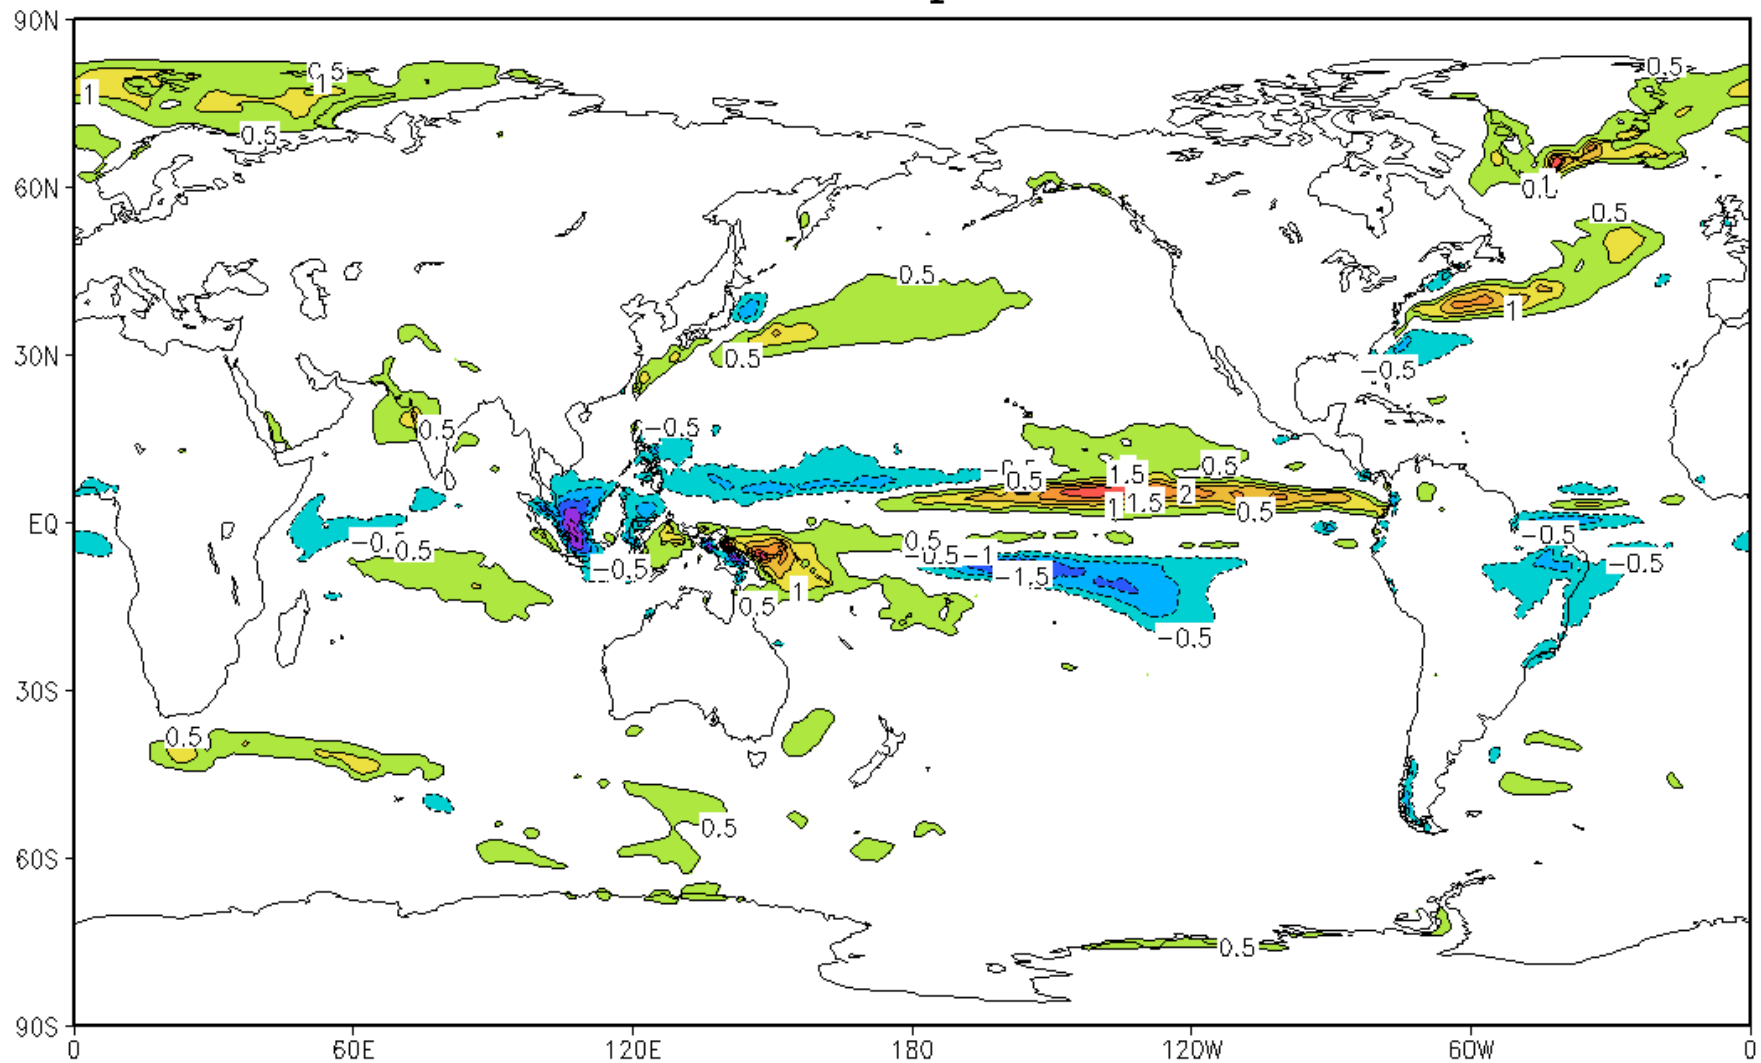

HRC-LRC SST

Annual Mean Rainfall HRC, CMAP

Annual Mean Precipitation HRC-LRC
