SIBER “HOT TOPICS” PRESENTATIONS AND DISCUSSION: Each SIBER delegate / meeting attendee has been assigned to give a very short presentation and lead the discussion on a “Hot Topic”. The idea is that we might choose to move one or more of these topics forward as a new SIBER initiative for motivating research, writing proposals, writing research and/or review papers, etc. Lets brainstorm a bit on how to make this happen. There will be a fixed time for each presentation / discussion of 10 minutes maximum, with a 5 minute presentation, a 5 minute discussion and a clear conclusion about what actions we will take and the relevant SIBER research theme. This will take 1.5 hours.

The following Hot Topics are proposed:

- Biogeochemical and ecological impacts of upwelling in the eastern Indian Ocean: From physics to fish. (Landry)
- Physical and biological impacts of topographic highs in the Indian Ocean. (Beckley)
