

OCEAN SCIENCES USING OCEAN OBSERVING PLATFORMS

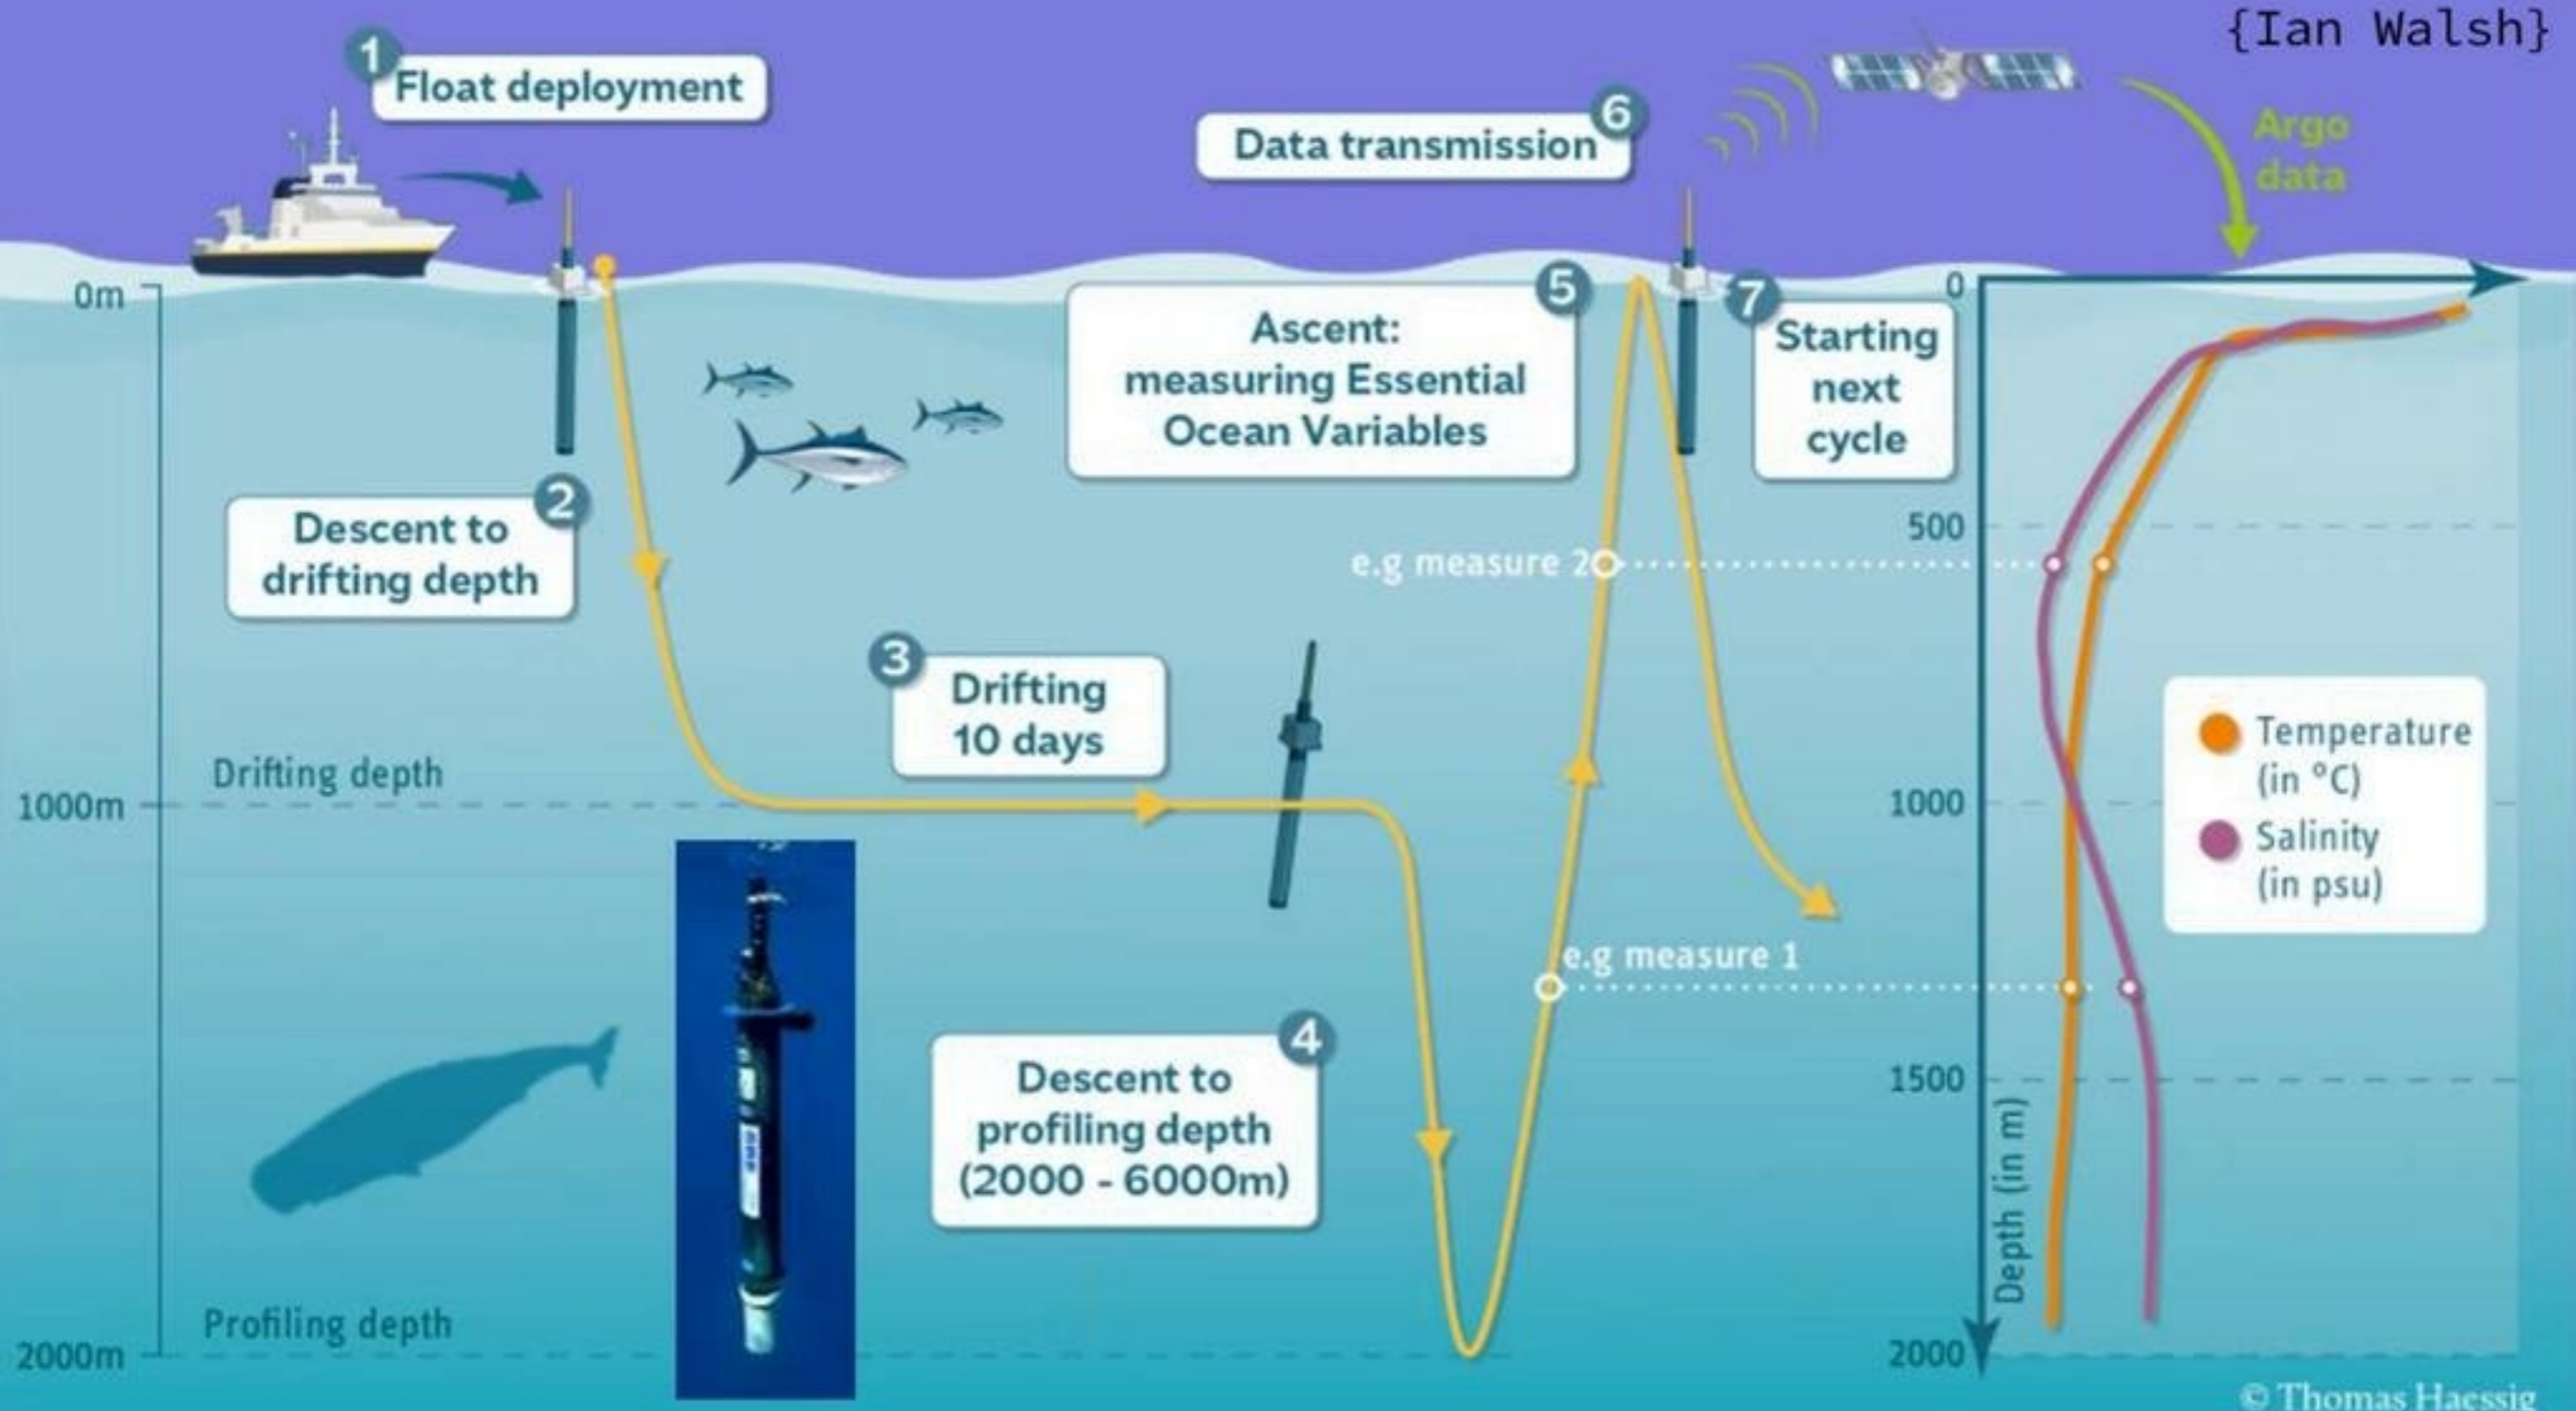

Dr. Tamaryn Morris
Senior Marine Scientist, South African Weather Service

PRESENTATION LAYOUT

- Ocean observing instruments
- Linking the coast to offshore regions
- How can you get involved?

OCEAN OBSERVING INSTRUMENTS

{Ian Walsh}

BUT WHAT OTHER OCEAN OBSERVING INSTRUMENTS ARE THERE?

OCEAN OBSERVING INSTRUMENTS

Surface and / or Met-Ocean - linked to **Ships Observation Team (SOT)**

OCEAN OBSERVING INSTRUMENTS

Surface - linked to **Global Sea Level Observing System (GLOSS)**

Sea level data are vital for

Research into sea level change and ocean circulation

Coastal protection during events such as storm surges

Providing flood warning and monitoring tsunamis

Tide tables for port operations, fishermen, and recreation

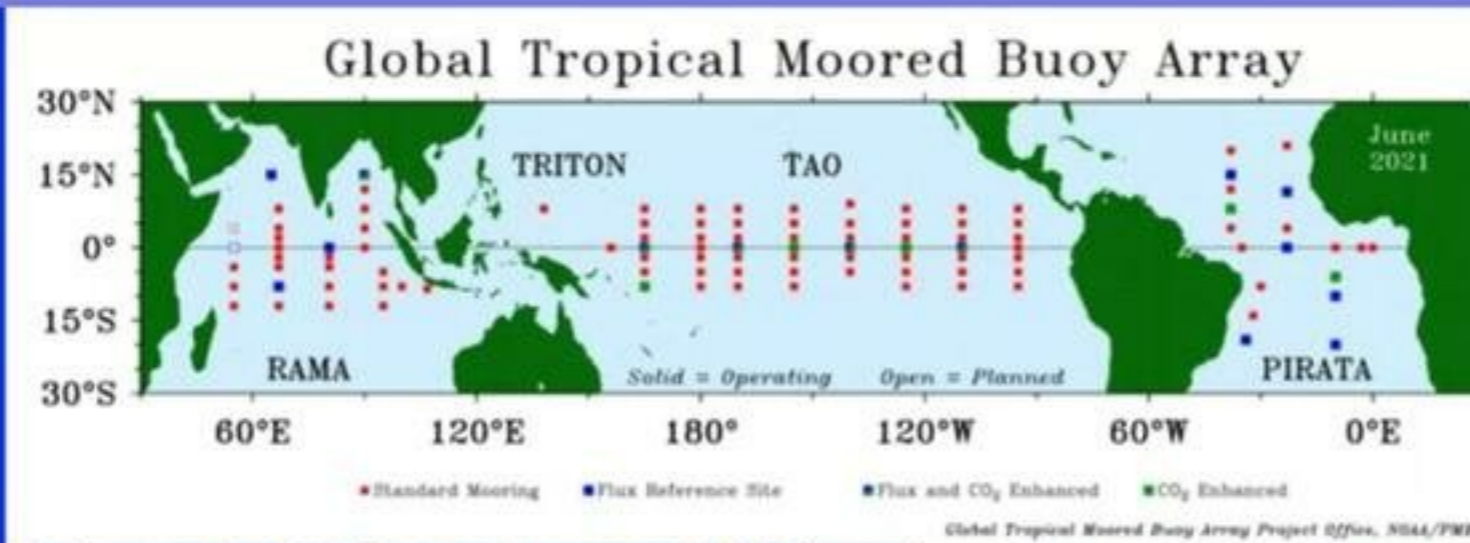

Defining datums for national or state boundaries

OCEAN OBSERVING INSTRUMENTS

Surface and / or Met-Ocean - linked to **Data Buoy Cooperation Panel (DBCP)**

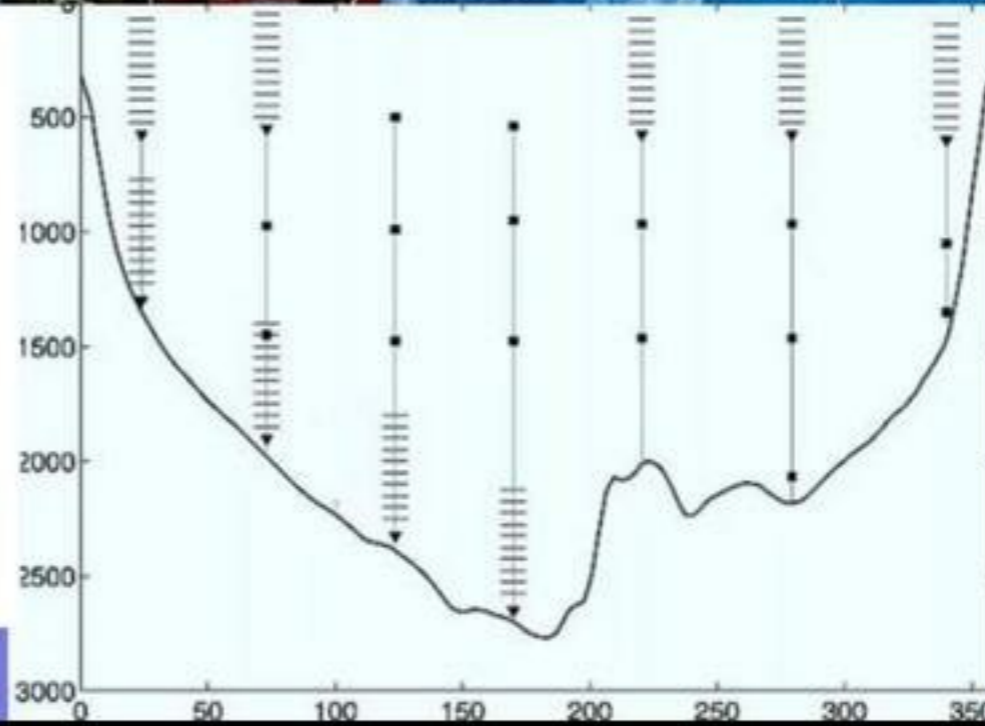

OCEAN OBSERVING INSTRUMENTS

Sub-surface - linked to **OceanGliders**

OCEAN OBSERVING INSTRUMENTS

Sub-surface - linked to **OceanSITES**

OCEAN OBSERVING INSTRUMENTS

Sub-surface - linked to **GO-SHIP**

GO-SHIP

Three Decades of GO-SHIP: Time-Series

August 2019

- At least three occupations
- Two occupations
- Recently introduced new lines

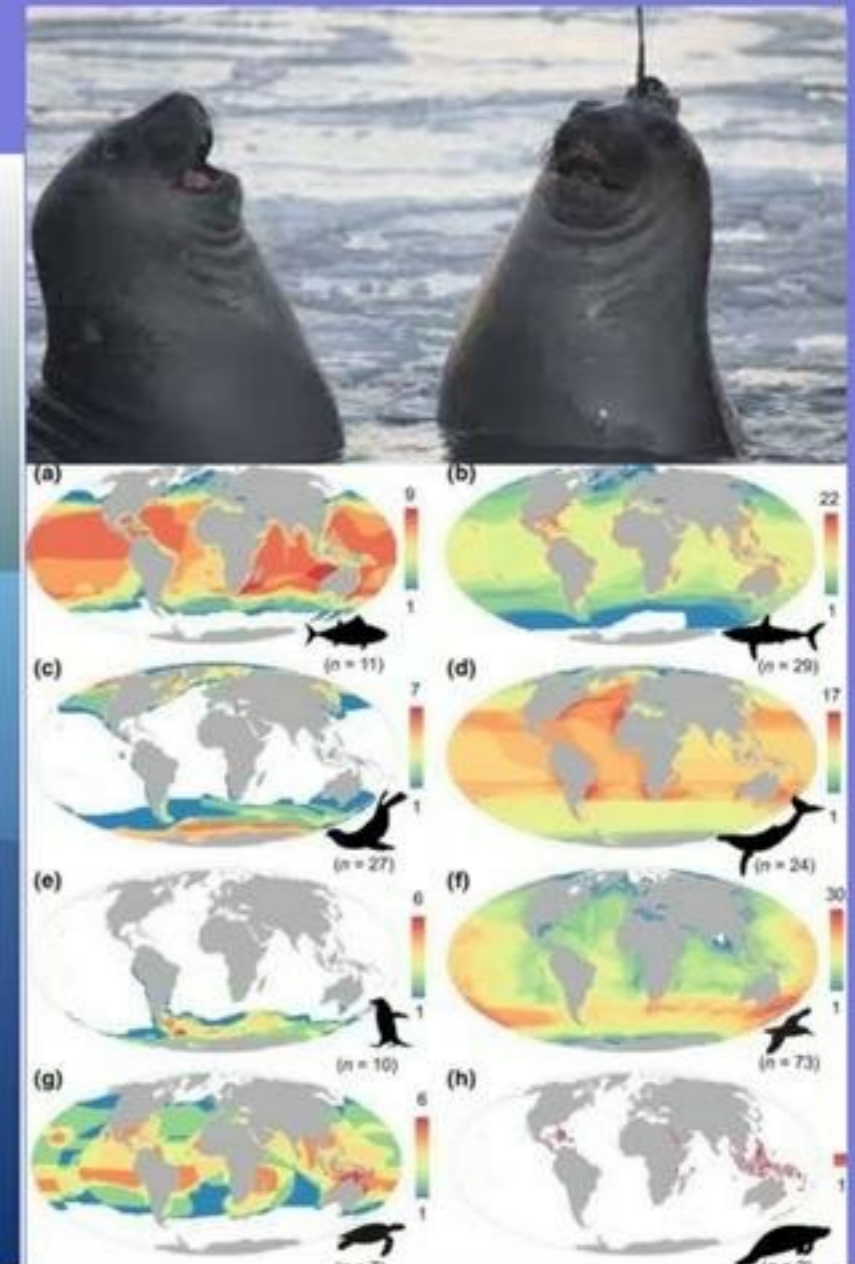

Generated by www.joannmaps.org, 11/09/2018

OCEAN OBSERVING INSTRUMENTS

Sub-surface - linked to **AniBOS**

FROM THE COAST TO OFFSHORE - ESTABLISHED IDEAS

Gliders

Moorings

Drifters

Ship-based

Argo floats are trickier as they require changes to mission parameters to capture data shallower than 2000 m

- AWS and upper air
- XBT, TSG, PCO2
- CTD surveys
- CPR tows
- Etc etc

FROM THE COAST TO OFFSHORE - EMERGING IDEAS

Saildrone - commercial company

HF Radar

HOW CAN YOU GET
INVOLVED?

INTERNATIONAL CONTEXT

Project Office

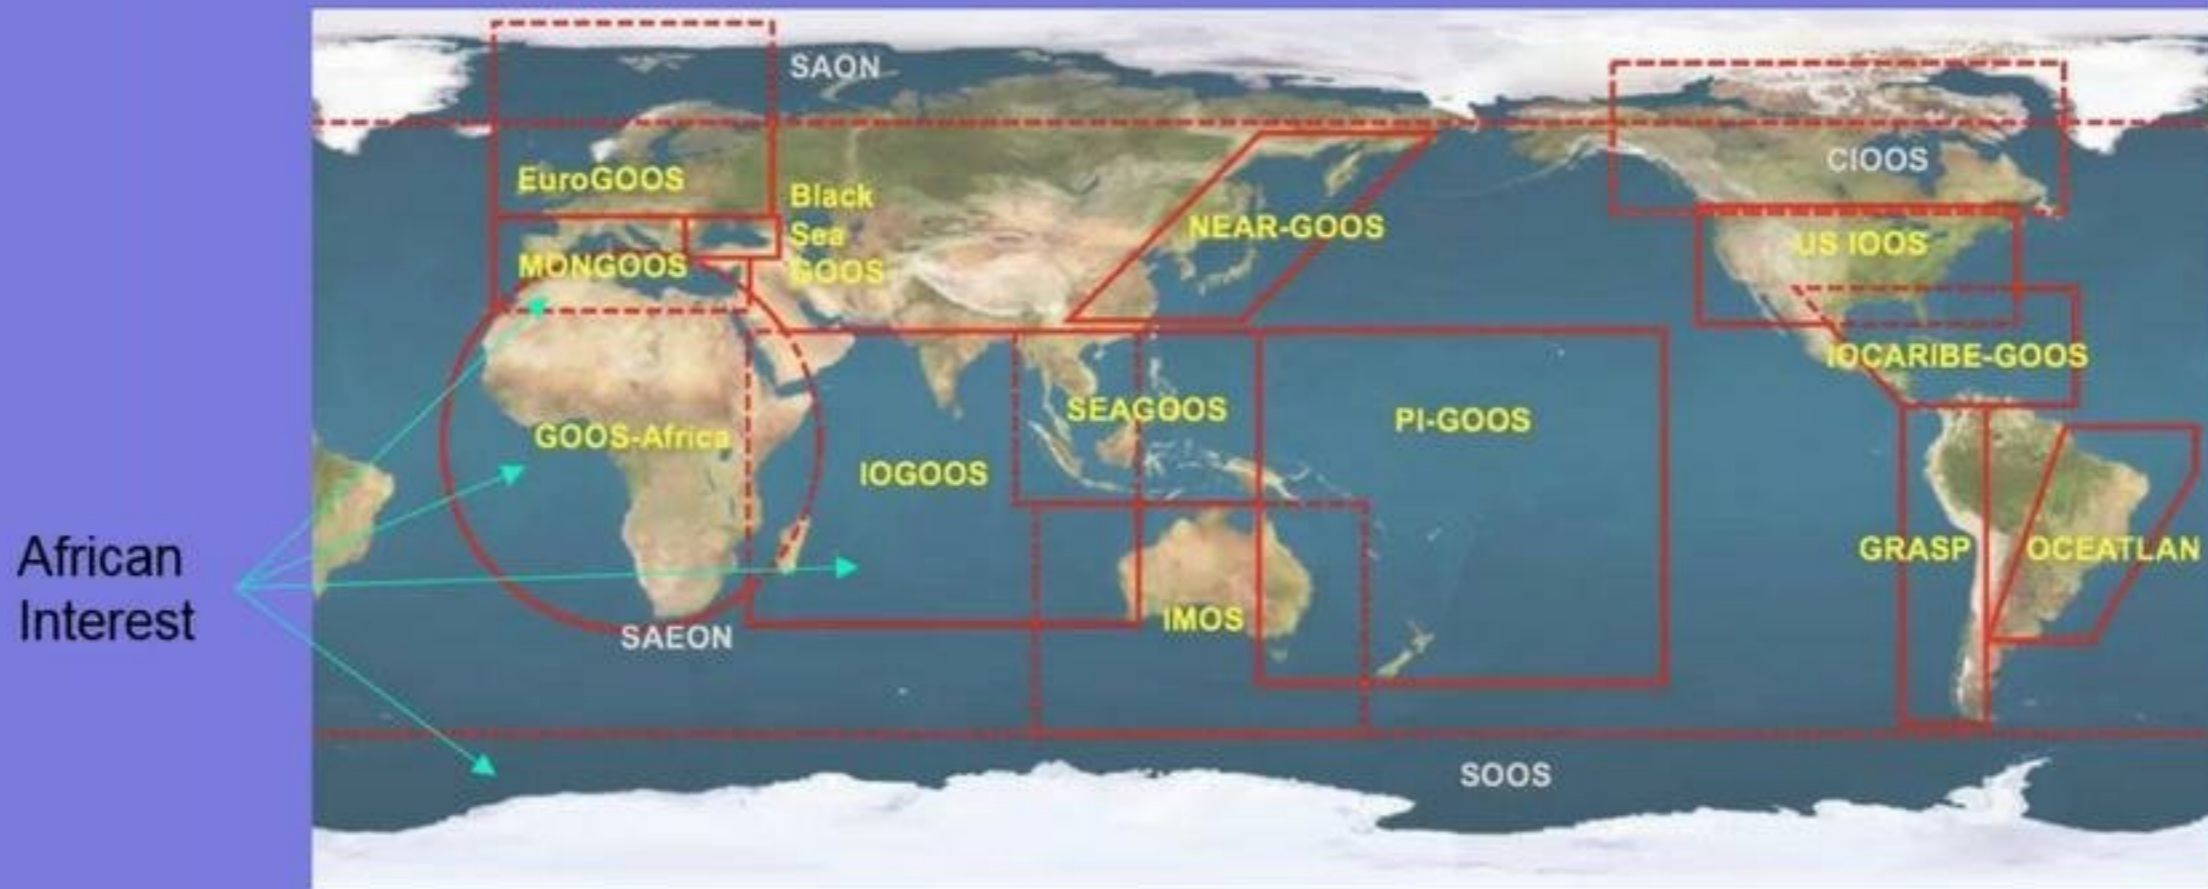

<https://www.goosocean.org/>

Multinational **Steering Committee** to provide oversight

Scientific **Expert Panels** to guide system requirements

Observations Coordination Group that implement global unified network execution

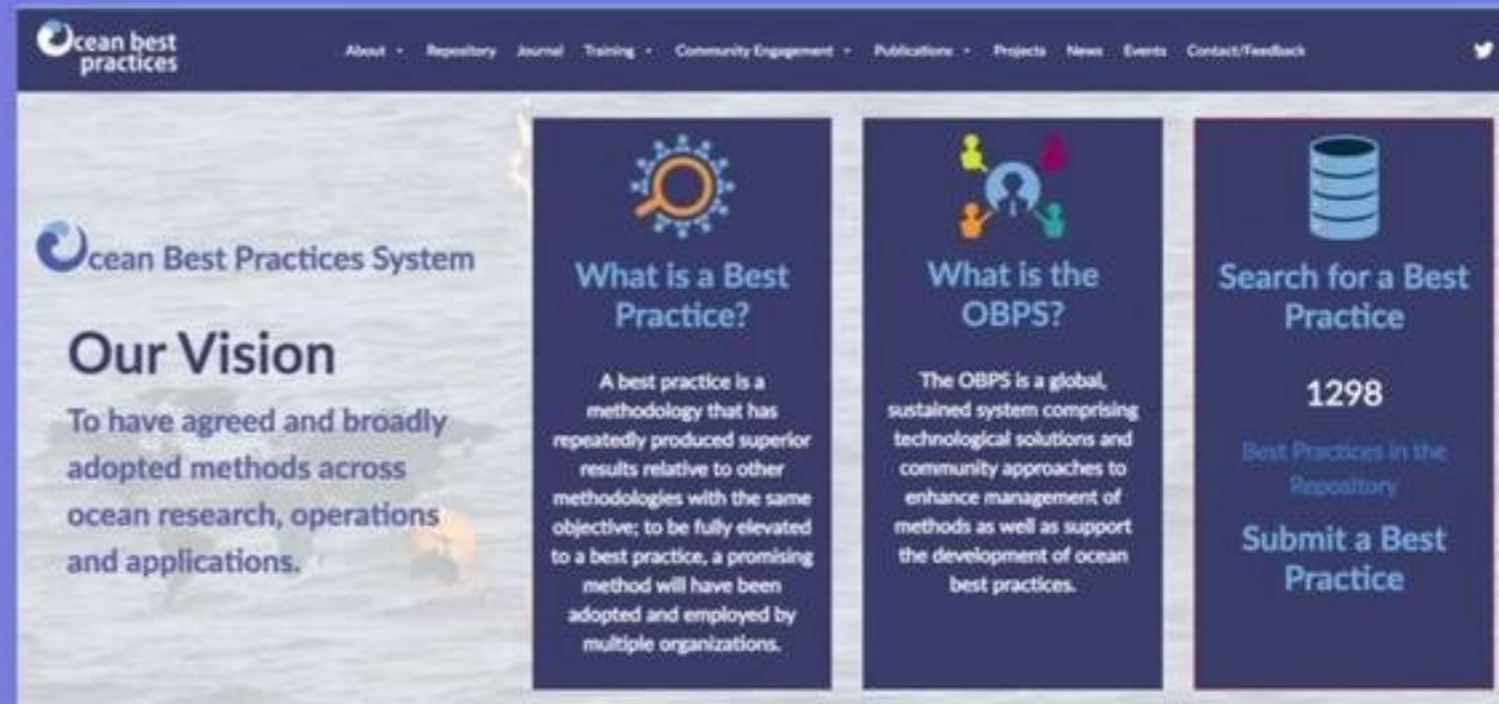

GOOS REGIONAL ALLIANCES (GRAS)

GRAs are coalitions of nations and/or institutions which share GOOS principles and goals, but are mostly concerned with local priorities and organized around regional seas or coastal environments.

GOOS RESOURCES

<https://www.oceanbestpractices.org/>

The screenshot shows the homepage of the Ocean Best Practices System. The header includes the logo and a navigation menu with links for About, Repository, Journal, Training, Community Engagement, Publications, Projects, News, Events, and Contact/Feedback. The main content area is divided into four columns:

- Our Vision:** To have agreed and broadly adopted methods across ocean research, operations and applications.
- What is a Best Practice?:** A best practice is a methodology that has repeatedly produced superior results relative to other methodologies with the same objective; to be fully elevated to a best practice, a promising method will have been adopted and employed by multiple organizations.
- What is the OBPS?:** The OBPS is a global, sustained system comprising technological solutions and community approaches to enhance management of methods as well as support the development of ocean best practices.
- Search for a Best Practice:** 1298 Best Practices in the Repository. Submit a Best Practice.

GOOS Webinar series on Boundary Currents, but also Ocean Info Hub and various data repositories of ocean observing systems

OCEANOPS

Discovering the interface: <https://youtu.be/kTK45zY8K0k>

Checking my fleet: <https://youtu.be/Mhp66mM8SVQ>

Filtering by EOV / Basin: <https://youtu.be/zgPXNvOIAAo>

Filtering by variables / depth: <https://youtu.be/-raxYBdJPwY>

*Submitting a cruise record: <https://youtu.be/wgA4LNOiVnl>

*Comparing (instrument) model performance: <https://youtu.be/fqMCktLPd3M>

DATA PORTALS

For Argo {Ian Walsh presentation}

<https://dataselection.euro-argo.eu/>

<https://fleetmonitoring.euro-argo.eu/dashboard>

For SOT

AWS and Upper air data from vessels of opportunity goes directly to the GTS.

However, XBT data can be found here:

<https://www.aoml.noaa.gov/phod/hdenxbt/index.php>

<http://www-hrx.ucsd.edu/links.html>

For GLOSS

<http://www.ioc-sealevelmonitoring.org/list.php>

<http://www.ioc-sealevelmonitoring.org/list.php>

https://www.psmsl.org/data/high_frequency/table.php

The screenshot shows a dashboard titled "2013 floats" with a table of float data. The table has columns for ID, Depth (m), Float name, Date, Last update, Status, Launch date, Cycle, Last cycle (days), and Surface float. The data is as follows:

ID	Depth (m)	Float	Date	Last update	Status	Launch date	Cycle	Last cycle (days)	Surface float
2902244	1701 4027	ARVOR	03/06/2021	126	🟢	2018-2021			
2903399	4790 6762	APEX	06/06/2021	24	🟢	2018-2021			
4903398	8823	SOLO_II	05/06/2021	25	🟢	2018-2021			
5906323	8940	APEX	07/06/2021	23	🟢	2018-2021			
5905344	7922	APEX	06/06/2021	133	🟢	2018-2021			
3901867	A2300- 16FROD 80000	ARVOR	03/06/2021	152	🟡	2018-2021	PLA31	2018	
3901878	A2300- 16FRO45 80000	ARVOR	09/06/2021	152	🟡	2018-2021	Trawl	2011	
4902997	1801	NAVIS_A	09/06/2021	152	🟢	2018-2021			

DATA PORTALS

For DBCP

Drifters:

https://www.aoml.noaa.gov/phod/gdp/real-time_data.php accessible through <https://www.osmc.noaa.gov/>

<https://www.aoml.noaa.gov/phod/gdp/interpolated/data/all.php>

https://www.aoml.noaa.gov/phod/gdp/hourly_data.php - use this one!!

(Falls under DBCP and OceanSITES)

Equatorial moorings:

<http://www.oceansites.org/tma/index.html>

For OceanGliders

Very limited regions where data is available:

- Coriolis gliders data sets on ERDDAP :

<http://www.ifremer.fr/erddap/tabledap/OceanGlidersGDACTrajectories.graph>

- IOOS gliders on ERDDAP :

<https://gliders.ioos.us/erddap/search/index.html?page=1&itemsPerPage=1000&searchFor=glider>

- IMOS web portal : <https://portal.aodn.org.au/search>

DATA PORTALS

For GO-SHIP

<https://www.go-ship.org/DataDirect.html> - entire data directory listed under variables

For AniBOS

The AniBOS portal is still being developed, so data is available at MEOP:

<https://www.meop.net/>

Emerging networks and others...

<https://www.sofaroccean.com/>

<https://www.saildrone.com/>

LASTLY...

Get involved!

The networks are open platforms where groups can get involved. South Africa does not have the resources to purchase loads of instruments, but we deploy for other teams and countries in our waters, increasing our observations whilst assisting global observations. We train our technicians on the instruments, we use the data for research.

Contact the OceanOps team: support@ocean-ops.org

Contact us in South Africa: tamaryn.morris@weathersa.co.za and we can help put you in touch too!
