

CLIVAR Early Career Scientists Symposium

Held after the 6th ODC training course in Sep, 2016

Summer courses

- **FIO-WCRP Agreement (2017). To host a Summer School on even years, beginning in 2018**
- **Agreement with ICTP to host a Summer School on odd years, beginning in 2019**

1st CLIVAR-FIO Summer School on Past, Present and Future Sea Level Changes. June 2018

ICTP-CLIVAR Summer School on Oceanic Eastern Boundary Upwelling Systems. July 2019

Summer Schools

- 1. CLIVAR-FIO Summer School on Ocean Macroturbulence and its role in Earth Climate (Postponed to 2022, aiming to be in-person, with virtual participation available) - by ARP**
- 2. Third Summer School on Theory, Mechanisms and Hierarchical Modeling of Climate Dynamics: Tropical Oceans, ENSO and their Teleconnections (Pending, originally planned from 3 to 14 August 2020) – by PRP**

Some Issues

- We can not keep postponing indefinitely, we have lost the momentum we had with the Schools in 2018 and 2019.**
- Summer Schools: 100% online ? (important networking opportunity for ECS) → Mixed?
FIO-IOC Summer School in 2021: In person for Chinese & International scientists already in China, virtual for others.**
- CLIVAR-FIO and CLIVAR-ICTP agreements provide important financial resources, when international travel is allowed (2022 ????), we might have several panels who want to organize Schools (i.e. NORP)**
