

Senior Support Scientist for Earth Sciences

Application Deadline: Open until Filled

The role of the Sr. Support Scientist will be to conduct day-to-day management and/or support of the Citizen Science for Earth Systems (CSES) program in the Earth Science Division (ESD) of NASA's Science Mission Directorate at NASA Headquarters. This role supports the Earth Science Data Systems Program Executive in carrying out the CSES research program. CSES has solicited research proposals for both developing sensor technology for use in citizen science, and proposals for carrying out Earth science research using citizen science approaches.

The Sr. Support Scientist will be the primary point of contact for the researchers awarded through the recent solicitation. For more information, go to
