Description:

Presenting a variety of treatment choices supported by the latest clinical research, **Physical Agents in Rehabilitation: From Research to Practice, 4th Edition** is your guide to the safe, most effective use of physical agents in your rehabilitation practice. Coverage in this new edition includes the most up-to-date information on thermal agents, ultrasound, electrical currents, hydrotherapy, traction, compression, lasers, and electromagnetic radiation. Straightforward explanations make it

easy to integrate physical agents into your patients' overall rehabilitation plans.

- Comprehensive coverage of all physical agents includes the benefits, correct applications, and issues related to thermal agents, hydrotherapy, traction, compression, ultrasound, electrical currents, and electromagnetic radiation.
 - **Clinical case studies** help sharpen your decision-making skills regarding important treatment choices and effective applications.
 - **Up-to-date, evidence-based practices** ensure you are using the best approach supported by research.
 - **Contraindications and Precautions** boxes explain the safe use and application of physical agents with up-to-date warnings for optimum care paths.
 - **Clinical Pearl boxes emphasize** the tips and tricks of patient practice.
 - **Application techniques** in step-by-step, illustrated resource boxes help you provide safe and effective treatments.

 - **NEW! Video clips** on companion Evolve site demonstrate techniques and procedures described in the text.
 - **NEW! Content specific to OTs** has been added to the core text including upper extremity cases for all physical agent chapters.
 - **NEW! Organization of the text by agent type** increases the book's ease of use.
 - **NEW! Expanded sections on thermal agents and electrical currents** will give students a better understanding of how to use these types of agents in practice.
